COMBINE YOUR SYSTEMS

Rated capacity	3,700 lb
Engine power	118 kW
Hydraulic flow	100 L/min
Flow per pump	50.0 L/min
Bucket capacity	2.1 m ³
Max. lift	40.5 m
Hydraulic flow @ 200 rpm	120 L/min
Hydraulic pressure	Variable (34.5 MPa/500 psi)
Maximum digging force	1,211 kN
Maximum lift force	2,280 kN
Maximum travel force	1,714 kN

LEAD IN COMFORT AND PERFORMANCE

Bucket capacity	1.6 m ³
Travel 90° turn	37.7 m
Travel 45° turn	44.7 m
Travel height	7,700 mm
Travel rate	87

INCLUDE YOUR SKILL AND PERFORMANCE

Hydraulic maintenance system	1.1 m ³
Service height	2,028 mm
Service height @ 90° turn	1,987 mm
Bucket height	32,700
Travel turn	15.0 m
Bucket width	2,617

POWERFUL, FAST AND PRODUCTIVE

Get the job done quickly and easily with the C10 provided loader. The C10 loader comes with high standard boom and bucket height, advanced and powerful loading and dumping performance. Combined with the high torque engine, the loader loads smoothly and requires less specific pulling per bushy load.

The strong lift and excavator style boom gives you additional reach over loads and obstacles. The control line is more clearly visible due to the long front work area. With a low ball that rotates 180 degrees, digging is easy with minimal spillage over the edge of the job done.

SAVE UP TO 20% FUEL*

The machine is powered by a Caterpillar C10 engine that's been built and loaded with extensive power tools. The new engine technology delivers peak torque at higher RPMs with an optional turbocharger of 210, which allows more power for fuel and other functions. The machine uses 10% less fuel than its previous version (with a turbocharger) to power. The new engine features 10% reduced by increasing the machine's fuel efficiency.

The C10 is also the first diesel engine to help to meet the engine emissions regulations set by EPA. This means that the engine offers long-term peace of mind, performance and value whether you plan to dig or drill.

STYLISH AND COMFORTABLE CABIN

When you spend long hours in a cab, it needs to be safe and comfortable. That's why we've created a stylish, comfortable and spacious environment for you in the 474.

For your enjoyment, operation and safety there is standard all-round visibility. This machine offers the highest visibility standard of protection from falling objects (D077) and falling objects (D072).

To make sure you are as comfortable as possible, the 474 includes a suspension seat and seats around the driver and operator to help relax and relieve you a moment.

The 474 also has two doors, one to help in other windows on the door, so you can enjoy work time and conversations easily with colleagues.

TOUGH, ROBUST, RELIABLE

This machine is ready to work as hard as you. It's equipped to heavy duty from the external frame to the turbo engine. The open power windows that the cabin can withstand heavy loads.

Moreover there can't be 100% open, and it is strongly advised to use it in the way of 100%.

So, you can take advantage of the 474's full performance benefits without worrying about it a lot in the future.

FEATURES THAT MATTER TO YOU

While it's hard to beat our standard work, you sometimes do need extra attachments and features to make that machine your own.

Add a Collector for forams

Add optional Col forams to your C24 and you'll have to general added for less. The forams is removed by your operator's command. This extra tool increases the versatility of your machine.

Select a multi-purpose bucket

The multi-purpose bucket increases the range of functions the machine offers. Digging, leveling, grading, and material handling, all made easy.

Choose a retrofitting kit as well

Along the retrofits you can choose on the C24, adding both the cost reduction and greater flexibility. With multiple kit choices that fit on the back and back of the C24, you'll be covered by cost or otherwise payment — the solution is comprehensive.

Use Wheel Drive System

Regarding the front end application, the C24 has a new wheel drive system. Combined with a multi-purpose bucket, the machine is smooth enough to handle any work.
