GAINWELL'S VISION FOR INDIA'S INFRASTRUCTURE GROWTH

Read the exclusive interview of our **Chairman & MD, Sunil Chaturvedi**, with NBM&CW magazine, where he discusses Gainwell's focus on integrated digital platforms and India-led manufacturing for global exports

KEY POINTERS:

- * Strong focus on integrated, end-to-end solutions beyond just selling machines
- * Digital platforms enable service booking, parts ordering, and real-time support
- * Expanding manufacturing in India for domestic demand and global exports
- * Exporting mining equipment to Australia, US, Africa, and Southeast Asia
- * Expanding mining portfolio in soft rock and hard rock segments
- * Partnerships with global OEMs to localize underground equipment manufacturing
- * TIL revival with major investments and new facilities in Greater Noida and Udaipur
- * Launch of Carry King 515, 85-ton truck crane, and empty container handler
- * Plans to scale crane capacity up to 250–300 tons
- * Full lifecycle support through AMCs and strong aftermarket service
- * Predictive maintenance via onboard computers and central monitoring
- * Road construction tech that records layer-wise data for quality transparency
- * Refurbished machines and rental models for price-sensitive customers
- * Push toward electronic engines for efficiency, lower maintenance, and sustainability
